

Discover excellence in shotcreting and mortar pumping with Utiform's V1, designed to deliver outstanding results in a variety of applications.

This powerful tool is an ideal choice for accurately and efficiently projecting concrete in pool construction, self-leveling mortar projection, slope stabilization, tunnel creation, and mining projects.

This year, it has been improved to ensure optimal performance in every application. Innovations in electrical panels and phases offer intuitive control and increased reliability, allowing for continuous, smooth, and safe operation at all times.

MORTER V1

DATA SHEET

MODEL	V1
ENGIN	Electrical 400v with frequency converter 50/60 HZ VFD
Power	7,5 KW
Pumping distance	120 Mts
Pumping height	50 Mts
Max granulometry	8 mm
Pumping pressure	30 BAR
Loading height	810 MM
Hopper capacity	100 L
Mixing capacity	Without
Dimensions	2490X990X840
Weight	256 KG
Stator	2L6 ; 60/12
