

The Utiform HD50 screed pump not only offers exceptional performance for tasks involving the distribution of large volumes of mortar, but it also features a 55-liter fuel tank, ensuring long working hours without interruptions. Additionally, its design facilitates regular maintenance with components such as the foldable radiator, which simplifies cleaning and inspection tasks. Whether for continuous mortar pumping work or for material distribution on construction sites, this machine is designed to maximize productivity and minimize fuel consumption.

	Bomba	Soladora
Model		HD50
Serie		Convey
Engine		Diesel Stage V 42KW
Compressor		5.2M3/MIN 8 BAR
Pumping Distance*		180mts
Pumping Height*		90mts
Pumping Pressure* cleanliness.		8BAR
Performance/Theoretical* Flow Rate.		5M3/H
Granulometry*		16MM
Pumping Height		900MM
Mixing Tank		260 L
Fuel Tank capacity.		55L
Dimensions		4630X1659X1470
Weight		1720
Cylinders		4
