

# MORTER He 260

The Utiform HE 260 screed pump is designed to deliver exceptional performance in applications requiring the transport of large volumes of mortar. Its powerful electric motor, combined with remarkable performance capacity, enables prolonged operating sessions without interruptions, ensuring high efficiency and workflow continuity. Furthermore, its pumping capacity extends to long distances and suitable heights, making it a versatile choice for a wide range of projects. Whether for large-scale construction sites or more specific tasks, the Utiform HE 260 stands out as an essential tool that optimizes every stage of the process. With its outstanding performance and adaptability, this machine might be the key you've been looking for to enhance the quality of your projects.

	<b>Pump</b>	<b>Mixing</b>
Model		He 260
Granulometry*		16mm*
Pumping Distance*		180mts
Pumping Height*		90mts
Engine		400V/ 50 HZ
Pumping Pressure		8bar
Performance/Theoretical Flow Rate		hasta 6M3/H
Loading Height		900mm
Dimensions		3300X1160X2370
Weight		730-920 Kg
